

## WESTERN VIRGINIA WATER AUTHORITY

### Capital Improvement Project Update November 2009

Construction on Phase I and Phase I-A portions of the U. S. Route 220 water line extension, which began in the summer of 2008 is complete. These phases consisted of the installation of approximately 26,800 linear feet of 12-inch water line with appurtenances in Roanoke County and extended the water line from the Clearbrook community to the Roanoke County/Franklin County boundary line. Fire hydrants were installed approximately every 1000 feet along the water line.

With Phase I of the project complete, Aaron J. Conner General Contractor is currently working between the Franklin County line and the Town of Boones Mill on Phase II of the project. Consisting of an additional 42,000 lineal feet of 12-inch water line, this water line project will provide reliable public water and fire protection for residents and businesses from the Roanoke County/Franklin County line to the Wirtz-Plateau Plaza area of Franklin County.

For additional information on this project, contact the Western Virginia Water Authority at 853-5700 or [info@westernvawater.org](mailto:info@westernvawater.org).
